

HOW TO PLAY:

A Black Jack side bet based on the first player's card and the first dealer's card being a pair.

Unique feature:

If the **player wins his hand** against the dealer, he will be paid **much more!** No other side bet worldwide offers this kind of excitement.

The min/max bet can be determined by the casino, this will of course also have an influence on the starting values of the jackpots.

The Crazy Twins jackpot will, like no other jackpot, contribute to the **primary objective** of a casino: **to ensure the guests to have a fun experience**.

Jackpot qualification happens every 6400 hands in average.

Imagine the 1st card of a player and the 1st card of a dealer is a 5 of hearts, a music tone goes off and all the players at the table receive a glass of champagne! The Blackjack game continues and the dealer slowly turns his cards.

If the qualified player beats the dealer, he wins the JACKPOT **and** all active players at the table will get a share of the COMMUNITY JACKPOT!

If he looses, he still gets a worthy 50 to 1.

PAI

Our latest sidebet sensors show the player where to place his chip and automatically process the bet in our unique software.

The software detects if there is a chip in the respective setting box and additionally displays this with an animated color pattern.
